

Broadcaster improves productivity by automating compliance processes

The Challenge

To improve productivity by checking detailed broadcast regulatory requirements have been fulfilled

The Solution

Designed and deployed a solution that includes a Virtual Worker checking what should have been broadcast against what was actually broadcast to ensure that the client is fulfilling its regulatory obligations

The Results

Significant increase in the speed with which the television channels are compliance checked

✓ Accuracy in transactions	100%
✓ Increase in productivity	80%
✓ Faster processing	200%
✓ Complex Processes Automated	Yes
✓ Reduction in hours spent on repetitive tasks per year	2,000
